

Colour Management Policy

BCQ Solutions Ltd is committed to maintaining the upmost quality to the services and products it supplies.

BCQ Solutions Ltd. will:

- Ensure that the colour quality policy represents the quality policy as far as the colour quality system is concerned.
- Use the ISO 12647-2 BPIF Scheme Certification Requirements version 3 November 2017 for the implementation of the scheme where applicable.
- Use the ISO standard 12647-2 and the lithographic printing process as the method of production within the scope of the certification. The 12647-2 procedures are used to demonstrate compliance.
- Use the percentage scoring systems weightings and the scoring system calculation as required by version 3 November 2017 of the BPIF scheme.
- Endeavour to ensure customer satisfaction through accurate colour reproduction and consistent quality against calibrated proofs for all jobs produced to the ISO 12647-2 standard.
- Ensure the training, development, and maintenance of the competence of all personnel within the scope of the colour quality and the production management system.
- Ensure the provision of the necessary infrastructure and equipment needed to produce compliant products.
- Undertake reviews on a regular basis of the capabilities of the infrastructure and equipment employed in the light of technological and other changes as they become available.
- Ensure the policy detailed above is communicated within the business and made available to all interested parties.
- Make this policy publicly available to interested parties on its company website along with other useful information for ISO 12647-2
